

MEETING HALFWAY

On Sustainable Development Solutions

In this three-part seminar, we invite you to a collective learning journey about global citizenship education and sustainable development. We'll be wrestling with questions such as:

- How relevant are the international frameworks to real sustainable development?
- Which competencies are needed to work in complex systems?
- How can we use our local insights to address critical global challenges?
- How can we benefit from global collaboration with less impact on the climate?

This online seminar is organized by Daka Network in cooperation with dock europe and SANA. Daka is a network for professionals working in the field of social, ecological development, and education in Hamburg and Dar Es Salaam.

As part of our engagement in the city partnership between Dar es Salaam and Hamburg we want to foster mutual exchange, dialogue and open up possibilities for more collaboration. To honor this long-standing city partnership, we would like to encourage people from these cities to join this conversation.

Sarah Nuedling

Consultant and facilitator:
Sustainable development
& global citizenship education

Yusuph Masanja

Projects planning, visual facilitation
coach & the ClimateForce Ambassador
